Software Developer

SUMMARY

Experienced Full Stack Developer with over 8 years of delivering scalable, high-performance applications for diverse industries. I specialise in creating seamless, user-friendly interfaces using modern front-end frameworks like React, Angular, and Tailwind, paired with robust back-end solutions in Node.js and .NET. My expertise extends to SQL database optimisation, API development, and deploying secure, efficient systems on Microsoft Azure with CI/CD pipelines.

Passionate about innovation, I thrive in fast-paced environments, solving complex problems and creating impactful solutions. With a solid foundation in computer science from high school and a Bachelor's degree from Edith Cowan University, I bring a strong technical foundation, attention to detail, and a drive to stay ahead of the curve in the latest technologies.

EXPERIENCE

Web Developer | Ordinary Agency

Sept 2022 – Present
- Developed and maintained websites, including integrating Play HQ with React / GatsbyJS for the Wolfpack Basketball site.
- Led a small development team and managed multiple CMS platforms, including WordPress, Webflow, and Contentful & Shopify

Full Stack Web Developer | Roobix

Jan 2022 – Sept 2022 (9 months)
- Sole developer responsible for managing hundreds of websites, primarily on WordPress with Elementor, hosted on Cloudways and AWS.
- Provided solutions for legacy websites, optimizing performance and addressing technical challenges.

Web Developer | PerthWeb

Sept 2020 – Dec 2021 (1 year 4 months)
- Developed custom websites from scratch based on client designs.
- Consistently met tight deadlines, often completing entire websites from design to staging within a week
- Built the Subiaco Scouts website and royalaeroclubwa.com.au, enhancing online presence.
- Worked closely with clients to realize their vision in the final product.

Web Developer / Native App Developer | PWD (Perth Web Design)

Oct 2016 – Aug 2020 (3 years 11 months)
- Built over 50 websites using WordPress and custom development, leading to high client satisfaction.
- Created WordPress plugins to achieve custom functionality for clients.
- Developed native apps using Xcode (Swift) and Android Studio (Java/Kotlin).
- Managed, fixed, and upgraded numerous websites, ensuring optimal performance.
- Collaborated with senior developers, participating in code reviews and Agile processes.
- Mentored junior developers, fostering a collaborative team environment.

IT Help Desk / Web Developer | Airefrig Australia

FEB 2015 – AUG 2016 (1 year 7 months)
- Created an Android app using Java to track refrigerant cylinders across national branches.
- Updated and maintained an existing cylinder tracking app for iOS.

- Redesigned the company website using HTML, CSS, JavaScript, and jQuery.
- Developed a mobile version of the website to improve user accessibility.
- Provided IT help desk support for over 100 employees, resolving technical issues promptly.
- Managed Office 365/Exchange deployment and upgraded systems from Windows XP to Windows 7.
